

22nd April. 2020

Introduction of WebEx Cisco and Google Meet

Dear Parents,

Greetings from South City International School!

I hope that you and your family are healthy and safe amidst this health crisis that has gripped the world right now.

In the last few days we have been working hard to keep our students engaged through online classes by uploading worksheets, learning aids, learning links for students and online learning platform. We are using different modes to keep working as there are no text books yet. We would like to do much more by interacting with them through other free online platform like **WebEx Cisco**, which is free for 90 days.

The Pre-Primary and Primary Section will be using **Webex Cisco** online platform and **Zoom** (for now) for their studies from Thursday, 23rd April, 2020.

The Secondary Section will be continuing with **Zoom** and **Google Meet**, which is another online platform that will be very useful for our Secondary Students to interact more and more with their teachers.

The PA and PE classes will continue with **Zoom**, with all the safety and security measures.

We have introduced these platforms as we are sure that these will add value to the online classes.

Thanking you for your cooperation as always.

John Andrew Bagul
Principal
South City International School
